

Assessment Resits: City and Guilds 2079-11 Refrigerant Handling, Category 1 (Level 2 certificate in F Gas and ODS Regulations)

One day resit sessions are available for engineers who fail either the theory or practical element of the City and Guilds 2079-11 assessment. Numbers attending are limited to provide time for revision of key points. These are not training sessions for inexperienced engineers - a five day session is available to provide in depth training.

Practical re assessment

The one day session to resit the practical assessment comprises:

- Complete demonstration of the practical assessment:
- Time for individual questions;
- The practical assessment.

The cost for the practical assessment resit is £225 plus VAT.

Knowledge assessment

The one day session to resit the online theory assessment comprises:

- Revision of key parts of the theory;
- Sample questions;
- Time for individual questions;
- The online knowledge assessment.

The cost for the knowledge assessment resit is £245 plus VAT.

Before a resit day

Before attending the resit day engineers should read through the relevant sections of the self study notes received before the original revision and assessment session. Anyone resitting a theory assessment will have received the scores for the original assessment and this will indicate the areas which need particular revision.
